Himachal Pradesh - Solan

EXPERIENCE

Software Engineer at Zendynamix

(Feb, 2023 - Current)

- Upgraded codebase from legacy material to primeNg, ensuring compatibility with the latest technologies and frameworks, and facilitating a smooth update to Angular 16. This transition has significantly **reduced build time by 20%**.
- Developed a standalone module to configure account settings for diverse clients via a dynamic UI. Enhanced efficiency and streamlined processes by implementing a **config-driven approach**. Integrated **Webs Sockets** for real-time updates.
- Created a **Node.js** application with **Mustache** templating, enabling users to effortlessly scan and connect to available Wi-Fi networks. Implemented a seamless routing mechanism for a user-friendly experience

SKILLS

- **Proficient:** JavaScript, HTML, CSS, React.js, Angular, Sass, TypeScript, Express.js, MongoDB, Redux, RxJs
- **Familiar:** React Native, Python, Flask, SQL, Chakra UI, Next.js
